

MOHAMED ELSAYED

FULL-STACK ENGINEER

mohammadelsayed002@gmail.com • +20 1093588197 • Alexandria, Egypt

[LinkedIn](#) • [Github](#) • [Portfolio](#)

PROFILE

Full-Stack Engineer specializing in the TypeScript ecosystem (Next.js, React, NestJS). Experienced in building scalable web platform, AI-integrated applications, and payment-enabled systems on modern cloud infrastructure. Strong focus on performance, i18n, and production readiness (CI/CD, monitoring).

EDUCATION

B.Sc. in Statistics & Computer Science - University of Alexandria 2025.

TECHNICAL SKILLS

Frontend: TypeScript, React 19, Next.js (App Router), Tailwind CSS v4, shadcn/ui, Zustand, Tanstack Query, Zod, Framer Motion, next-intl (i18n), React Hook Form, react-window (virtualization).

Backend: Node.js, NestJS, FastAPI (Python), Express.js, tRPC, RESTful APIs, OpenAI SDK, Inngest (Durable Execution), Microservices architecture.

Database & Auth: PostgreSQL, MongoDB, Prisma ORM, Database Indexing, Better Auth, JWT, Stripe Integration, UploadThing, Firebase.

Cloud & Infrastructure: AWS (S3, Lambda, API Gateway, DynamoDB, SQS, CloudFront, Bedrock), Docker, CI/CD (Github Actions), Serverless Architecture, Vercel Deployment, Terraform (basic).

AI & Integrations: OpenAI API, RAG, AI Agents, Prompt Engineering, embeddings.

Tools & Observability: Git, Jest (Unit Testing), Sentry (Monitoring), Logging & Error Tracking

Methodologies: SOLID Principles, Clean Architecture, Agile/Scrum, Component-Based Architecture, Performance Optimization

EXPERIENCE

Freelance Full Stack Engineer (Aug 2025 - Mar 2026) Multiple Projects

- **Car Wash Management Platform**
 - Developed MERN platform with 40+ components and Arabic RTL UI; integrated HyperPay (Apple Pay, Visa/Mastercard) and secure webhooks; implemented QR redemption and real-time usage tracking.
- **A&T Tours**
 - Developed a multilingual travel booking platform (AR, EN, RU, IT) using Next.js, TypeScript, Prisma, and PostgreSQL, featuring rich service pages, secure booking API, and an admin dashboard with CRUD and media management. Optimized UX, SEO, responsive design, and reusable UI components. [Project](#)
- **Completed 2 paid projects on Mostaqi with 5/5 client ratings.** [Reviews](#)

Front-End Developer Elevate (Nov 2024 - Jul 2025)

- Collaborated in an Agile team of 8 to build a large-scale Next.js application, contributing to a high-velocity codebase (500+ commits) while managing feature integration and conflict resolution in weekly merge meetings.
- Engineered modular features using Next.js (App Router), Next-Auth, and Next-Intl (i18n), maintaining strict clean code standards and utilizing Jira/GitHub for production-level task tracking and code reviews.
- Managed the development workflow by assigning tasks in Jira, overseeing GitHub pull requests and conflict resolution, and coordinating team communication via Slack to ensure high-quality delivery [Project Link](#).

PROJECTS

CareerCast AI – Full-Stack AI Orchestration Platform

[GitHub Project](#)

Next.js 15 · React 19 · Inngest · tRPC · PostgreSQL · OpenAI SDK

- Built three microservices: Podcast Generator (TTS/Image/PDF), Intelligent CV Reviewer, and Cover Letter Generator.
- Engineered durable orchestration with Inngest and atomic step functions (retry policies) to ensure 100% task completion despite external API failures.
- Implemented subscription & usage-limits using Polar + Better Auth; added UploadThing for secure media storage and managed large media assets.

Twin AI

[GitHub Project](#)

Serverless Chat App | Next.js, FastAPI, AWS Bedrock, Lambda, API Gateway, S3, CloudFront, Terraform, Github Actions

- Built a full-stack chat app with Next.js (React + Tailwind) and FastAPI integrating AWS Bedrock for LLM responses and maintaining multi-turn sessions
- Deployed a production serverless stack using Terraform Lambda (Magnum) + API Gateway + S3 (memory + frontend hosting) + CloudFront, with automated deploy/destroy via Github Actions

Flower Obsession – Full-Stack E-commerce

[GitHub Project](#)

Next.js 14 · NestJS · MongoDB · Stripe · i18n (EN/AR RTL)

- Architected a scalable full-stack e-commerce platform consisting of a Next.js 14 storefront and a dedicated NestJS (Node.js) backend, supporting high-concurrency product browsing and complex florist business operations
- Implemented a custom Internationalization (i18n) strategy using Middleware-based routing, providing a fully localized experience in Arabic and English with SEO-friendly dynamic routing and Right-to-Left (RTL) layout support
- Integrated a secure multi-channel payment gateway supporting both Stripe Checkout and Cash on Delivery
- Developed a high-performance Admin Dashboard utilizing React Query for optimistic updates and caching, delivering real-time business insights, revenue analytics and seasonal trend tracking via a role-based access control (RBAC) system
