# Mohamed Elsayed

Full-Stack | Frontend (JavaScript, TypeScript, Next.js, Node.js,  
Nest.js, MERN Stack, REST APIs)  
Alexandria, Egypt

## Summary

Highly motivated Full-Stack Software Engineer with a B.Sc. in Computer Science and Statistics, specializing in building robust, scalable web applications and APIs using modern technologies like React, Next.js, Node.js, and NestJS. Proven ability to design and implement end-to-end solutions, leveraging microservices architecture, RESTful APIs, and event-driven systems. Experienced in optimizing applications for maximum performance, scalability, and security, with a strong foundation in frontend development, backend logic, database management (MongoDB, PostgreSQL, MySQL), and cloud deployment practices. Eager to contribute to a dynamic team focused on simplifying complex logistics challenges and providing real-time data solutions.

---

## Experience

### Freelancer

Full Stack Developer (MERN Stack)  
August 2025 - September 2025 (2 months)  
Alexandria, Egypt

- Developed Full-Stack Car Wash management platform using MERN stack (MongoDB, Express.js, React.js, Node.js) with complete Arabic RTL interface 40+ responsive components and RESTful API architecture
- Integrated Hyperpay payment gateway supporting Apple Pay and Visa/Mastercard with secure webhook handling, JWT authentication, and Arabic-Language payment flow implementation optimized for regional users
- Engineered QR-code base service redemption system enabling customers to purchase packages online and redeem washes at Car wash stations with real-time validation, automatic counter management, and Arabic interface.

- Built comprehensive admin dashboard with business analytics, user management, QR code verification, transaction monitoring, and reporting features with native Arabic RTL design
- Implemented multi-tier package system (Standard & VIP) with branch selection, location mapping, washing progress tracking, customer feedback collection, and tip management with culturally adapted UI
- Designed scalable backend architecture with modular API structure (10+ endpoints), secure authentication flows, payment webhook processing, database optimization, and comprehensive error handling with Arabic support

## Elevate Tech

### Frontend Developer

November 2024 - May 2025 (7 months)

Cairo, Egypt

- Collaborated with a team of 8 developers under the guidance of a senior frontend engineer, working in an Agile/Scrum environment.
- Contributed to a large-scale Next.js application (500+ commits, 54 branches), participating in weekly merge meetings to integrate features and resolve conflicts.
- Built and maintained features using Next.js (App Router), implementing authentication with next-auth and internationalization with next-intl.
- Followed clean code and modular architecture principles to improve maintainability across shared components.
- Used GitHub, Jira, and Slack for task tracking, code reviews, and team communication in a production-like workflow.
- Public project repository: <https://github.com/MohamedElsayed002/e-commerce-flower-shop>

## CIB Egypt

### Internship Trainee

August 2024 - September 2024 (2 months)

## Route

### Backend Developer — (Training Program)

January 2024 - May 2024 (5 months)

Cairo, Egypt

- Designed and developed a complete e-commerce backend system using Node.js and Express.js, following RESTful API best practices.

- Implemented authentication and authorization, product management, order processing, and role-based access control.
- Designed and managed databases using MongoDB (Mongoose) and MySQL, ensuring data integrity and scalable schema design.
- Built modular backend architecture with a clear separation of routes, controllers, services, and data layers.
- Collaborated with peers in remote development sessions, participating in code reviews and receiving guidance from senior mentors.

## Scrimba

### Frontend Developer

April 2022 - March 2023 (1 year)

- Completed a comprehensive 11-month career path program covering HTML, CSS, JavaScript, React, and UI/UX fundamentals
- Built over 20 interactive front-end projects, applying best practices in responsive design and accessibility
- Gained proficiency in React hooks, state management, component design, and API integration
- Practiced version control with Git and deployed projects to GitHub and Netlify
- Engaged in peer code reviews and project challenges to simulate real-world workflows

## Proper Business Solutions

### Customer Service Representative

June 2022 - January 2023 (8 months)

- Communicated with U.S. property owners to assess interest in real estate sales opportunities
- Built rapport with clients and gathered information about their property ownership and sale intentions
- Collaborated closely with a remote team and team leader to improve call strategies and conversion rates
- Gained confidence in remote work communication and professional follow-ups with clients

---

## Education

### Alexandria University

Bachelor of Science - BS · (August 2021 - June 2025)

### El Nasr Boys' School
